extensively up to about 1992. After that it only mentions laws that have passed up to 1994. For a topic that is inherently derived from the use of the Internet this doesn't strike me as being very up-to-date. However, seeing as we used this text in our class I guess that means there aren't too many good texts out there on the subject. Maybe this is your best bet. But, it really is outdated. 1 of 1 people found the following review helpful. Cyber Law By Mission Cyber Law is an eye-opener for anyone who plans to start a web based business.
