Jonathan E. Nuechterlein, Philip J. Weiser : Digital Crossroads: Telecommunications Law and Policy in the Internet Age (MIT Press) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Digital Crossroads: Telecommunications Law and Policy in the Internet Age (MIT Press):

0 of 0 people found the following review helpful. Great background for someone getting into the telecom world or ...By JGMGreat background for someone getting into the telecom world or anyone looking for a refresher. I just

started working on telecom policy earlier this year, and this book has provided helpful background and context, weaving enough detail to be a serious resource with a conversational style that makes it very readable and accessible to the novice such as myself. 0 of 0 people found the following review helpful. Five Stars By Brittany Product as described. 0 of 0 people found the following review helpful. Five Stars By Alexander Correavery good book. very understandable and easy to digest

A thoroughly updated, comprehensive, and accessible guide to U.S. telecommunications law and policy, covering recent developments including mobile broadband issues, spectrum policy, and net neutrality. In *Digital Crossroads*, two experts on telecommunications policy offer a comprehensive and accessible analysis of the regulation of competition in the U.S. telecommunications industry. The first edition of *Digital Crossroads* (MIT Press, 2005) became an essential and uniquely readable guide for policymakers, lawyers, scholars, and students in a fast-moving and complex policy field. In this second edition, the authors have revised every section of every chapter to reflect the evolution in industry structure, technology, and regulatory strategy since 2005. The book features entirely new discussions of such topics as the explosive development of the mobile broadband ecosystem; incentive auctions and other recent spectrum policy initiatives; the FCC's net neutrality rules; the National Broadband Plan; the declining relevance of the traditional public switched telephone network; and the policy response to online video services and their potential to transform the way Americans watch television. Like its predecessor, this new edition of *Digital Crossroads* not only helps nonspecialists climb this field's formidable learning curve, but also makes substantive contributions to ongoing policy debates.

About the Author Jonathan E. Nuechterlein is chair of the telecommunications practice at the international law firm of WilmerHale. He served as Deputy General Counsel of the Federal Communications Commission from 2000 to 2001 and as Assistant to the Solicitor General from 1996 to 2000. Philip J. Weiser is Dean of the Law School, Thompson Professor of Law and Telecommunications, and Founder and Executive Director of the Silicon Flatirons Center for Law, Technology, and Entrepreneurship at the University of Colorado Boulder. From 2009 to 2010, he was Deputy Assistant Attorney General, and from 2010 to 2011, he was a Senior Adviser on Technology and Innovation at the National Economic Council in the White House under President Obama.
