By Anne Marie
There are no accidents: I met the author of this book when she had just received her first copies from the publisher; I was floundering trying to get accurate information about what to do, when and how to do it. Lawyers, legal referrals, community organizations and friends were trying to "help" by offering advice, much of it well-intended but inaccurate and COSTLY, both in the short- and long-term. Linda Power's book is easy to read, well-organized, well-written, has excellent cross references, and nudges of positivism throughout: it has been both a life and time saver. It helped me to understand the legal terminology with which I was unfamiliar, and to be aware of the pitfalls of the legal system, specifically in relation to women's issues in matters of divorce and family law. I recommend this book to others who are going through the divorce process whether you initiate it or are on the receiving end [KNOW what your attorney and the courts are saying to you, and what you might expect] and to attorneys who would like their clients to be well-informed and prepared. And shouldn't that be all attorneys...?
