**Randall M. Kessler : Divorce: Protect Yourself, Your Kids, and Your Future** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Divorce: Protect Yourself, Your Kids, and Your Future:

You have arrived at a decision: you want a divorce or you are seriously thinking about it. Or perhaps your spouse has made that decision for you, and now you are forced to think about how to protect yourself. Regardless of who initiated it, the decision to divorce is rarely a sudden one. Perhaps when you look in the mirror each morning you say to yourself, "I need to get out of this marriage. It is no longer working and it is beyond repair. I need to start a new life." Or maybe your spouse has made that decision for the both of you. We all want to stay in love forever, but that is not always life's reality. In fact, nearly 50 percent of all marriages in the United States will end in divorce. Nobody wants to be part of this statistic; nevertheless, when all hope for reconciliation is gone, sometimes divorce is the only avenue for recapturing the life you deserve. This book is what every good divorce lawyer wishes their clients had read before the case. It will provide the reader with insight that often takes months or years and thousands of dollars to acquire. "Divorce: Protecting Yourself, Your Kids, and Your Future" will give you a head start in this difficult process. Knowledge is power, so why not become knowledgeable about the process, and why not gain that knowledge now,

before you spend more time and money learning many of the same lessons the hard way?
