From Hart Publishing : Doping in Sport and the Law before purchasing it in order to gage whether or not it would be worth my time, and all praised Doping in Sport and the Law:

This unique international legal and cross -disciplinary edited volume contains analysis of the legal impact of doping regulation by eminent and well known experts in the legal fields of sports doping regulation and diverse relevant legal

fields. It also contains perspectives on medicine and psychology which are intrinsically important areas for consideration in the sports doping landscape. These are thoughtful extended reflections by experts on theory and policy and how they interact with law in the context of doping in sport. It is the first book to examine the topical and contentious area of sports doping from a variety of different but very relevant legal perspectives which impact the stakeholders in sport at both professional and grass roots levels. The WADA Code contains an unusual mix of public and private regulation which is of more general interest and fully explored in this work. Each of the 15 chapters addresses doping regulation from a legal perspective such as tort, corporate governance, employment law, human rights law, or a medical or scientific area. Legal areas are generally considered from an international and not national perspective. Issues including fairness, logic and the likelihood of compliance are explored. It is vital reading for anyone interested in the law, regulation and governance of sport. [Subject: Sports Law, Medical Law and Ethics, International Law]

This book is a must read for lawyers wanting to know more about the Code and the complex web of legal and social considerations surrounding its enforcement. It is also a significant resource for athletes, officials, coaches and sports administrators. -- Anthony Lo Surdo * Australian Banking and Finance Bulletin * This new book is a timely and welcome addition to the literature on this subject [....]. I wholeheartedly recommend this book to all of those with an interest in doping in sport. -- Prof Dr Ian Blackshaw, International Sports Lawyer * Global Sports Law and Taxation Reports * This text will be of interest to legal practitioners who practise or are interested in sports doping, particularly those who wish to go beyond the wording of the Code and consider the history and policy rationale for the unique regulatory framework for sports doping. -- Martin Ross, partner, Hall Wilcox * Law Institute Journal * ...this book is undoubtedly a valuable resource for anyone seeking to understand more about doping regulation, particularly the WADA Code, and especially how it operates across jurisdictions...It succeeds in its ambitious aim of availing the reader with cogent and insightful analysis and comment on a range of legal issues germane to anti-doping generally, and the WADA Code specifically. -- Jonathan H. L. Rees, Bristol University * Entertainment and Sports Law Journal * The book should be an important addition to the libraries of practitioners and sports administrators harbouring a desire to deepen their knowledge of the legal issues surrounding doping in sport, while also gaining an appreciation of the wider social and societal implications of sport and what many consider to be one of the darkest forms of cheating. -- Darren C Kane * Australian Law Journal * About the Author Ulrich Haas is Professor of Law at the University of Zurich, Switzerland. Deborah Healey is Associate Professor of Law at UNSW, Australia.
