From Ingramcontent : Ecological Systems Integrity: Governance, law and human rights before purchasing it in order to gage whether or not it would be worth my time, and all praised Ecological Systems Integrity: Governance,

law and human rights:

Environmental law and governance are the cornerstones of global efforts to conserve the environment, protect resources and ensure fair and equitable outcomes for all of the planet's inhabitants. This book presents a series of thought-provoking chapters which consider the place of governance and law in the defence against imminent and ongoing threats to ecological, social and cultural integrity. Written by an international team of both established and early-career scholars from various disciplines and backgrounds, the chapters cover the most pressing and contemporary issues in environmental law and governance. These include access and benefit-sharing; the right to food and water; climate change coping and adaptation; human rights; the rights of indigenous communities; public and environmental health; and many more. The book has a general focus on environmental governance and law in the European Union and offers points of comparison with Canada and North and South America.

About the Author Laura Westra is professor emerita (philosophy), University of Windsor, Canada, a sessional instructor at the Faculty of Law, University of Milano (Bicocca), Italy, and visiting professor at the University of Trento, Italy. Janice Gray is senior lecturer at UNSW Law, University of New South Wales, Australia.
