before purchasing it in order to gauge whether or not it would be worth my time, and all praised Elder Law Litigation Strategies: Leading Lawyers on Understanding the Changing Landscape of Elder Law Litigation and Its Affect on Client Needs (Inside the Minds):

0 of 0 people found the following review helpful. Save your money, overpriced and Underwhelming. By CustomerNot very extensive information provided when you consider the cost of this book. Small, 191 pages and not a coherent or cohesive flow to the text. The book reads as though each attorney got approximately 20 pages to say everything they need to say about their Elder Abuse Litigation Practice, but that is no where near enough room. My advice is save your (\$65 plus in my case) money and seek out other practice guide material. This book should cost no more than \$25 maximum and is a shamefully overpriced series of "tips and tricks" which is already getting outdated. Everything I've read in this "book" (I would never call this a text) is readily available online. Issues not discussed include the CCP 338 issue re: Statutory Cause of Action in Elder Abuse Litigation relating to Statute of Limitations and the book does not provide even a basic suggested template for pleading a complaint, which is of ultimate importance as the cause of action requires "fact pleading" (not discussed). Again, save your money. This is clearly a business venture for one or more of the authors and not very helpful.
