Fred Bosselman, Joel B. Eisen, Jim Possi, David B. Spence, Jacqueline Weaver : Energy, Economics and the Environment, Second Edition (University Casebooks) before purchasing it in order to gage whether or not it would be worth my time, and all praised Energy, Economics and the Environment, Second Edition (University Casebooks):

This text is organized roughly chronologically, according to the periods in history within which the issues arose. Economic and environmental issues are integrated with energy resource issues: energy policy, energy in nature, the

concept of a public utility, water power, coal, oil, natural gas regulation before 1985, rate regulation, competitive markets in natural gas, introduction to electricity, wholesale electric power competition, stranded costs, retail competition in electric power, nuclear energy, energy in transportation, international petroleum, the climate change issue, and continuing issues in economic regulation.
