Clifford Rechtschaffen, Eileen Gauna, Catherine O'Neill : Environmental Justice: Law, Policy Regulation

before purchasing it in order to gage whether or not it would be worth my time, and all praised Environmental Justice: Law, Policy Regulation:

0 of 0 people found the following review helpful. Good review of legal cases and case studiesBy Dylan FrazierBook is a good review of legal cases but lacks any broader interpretations. Good book for environmental law students and teachers.0 of 0 people found the following review helpful. Five StarsBy Jessica JoyceExcellent condition1 of 4 people found the following review helpful. MehBy Sam AndrewsWhile this anthology has lots of information, much of the sources seem to simply regurgitate what has been already written about in previous articles. Furthermore, the books

appears rather biased with its "review" questions always attempting to side with the environmental racism advocates.

Environmental justice is a significant and dynamic contemporary development in environmental law. Rechtschaffen, Gauna and new coauthor O'Neill provide an accessible compilation of interdisciplinary materials for studying environmental justice, interspersed with extensive notes, questions, and a teacher's manual with practice exercises designed to facilitate classroom discussion. It integrates excerpts from empirical studies, cases, agency decisions, informal agency guidance, law reviews, and other academic literature, as well as community-generated documents. This second edition includes new chapters addressing climate change, international environmental justice, and a capstone case study. It also adds expanded coverage of risk and the public health, empirical environmental justice research, and environmental justice for American Indian peoples.
