Zygmunt J.B. Plater, Robert H. Abrams, Robert L. Graham, Lisa Heinzerling, David A. Wirth, Noah D. Hall :  
Environmental Law and Policy: Nature Law and Society (Aspen Casebook) before purchasing it in order to gage  
whether or not it would be worth my time, and all praised Environmental Law and Policy: Nature Law and Society  
(Aspen Casebook):

When you purchase a new version of this casebook from the LIFT Program, you receive 1-year FREE digital access to the corresponding Examples Explanations in your course area. Now available in an interactive study center, Examples Explanations offer hypothetical questions complemented by detailed explanations that allow you to test your knowledge of the topics covered in class. Starting July 1, 2017, if your new casebook purchase does not come with an access code on the inside cover of the book, please contact Wolters Kluwer customer service. The email address and phone number for customer service are on the copyright page, found within the first few pages, of your casebook.

**Environmental Law Policy: Nature, Law Society** is a coursebook designed to access the law of environmental protection through a taxonomic approach. It explores the range of legal structures and legal methodologies of the field rather than simply designing it according to air, water, toxics, etc. as subject media (which often results in duplicative legal coverage). All the major subject areas of pollution and resource conservation are covered, but they are covered according to the legal approaches they represent. The book is Saxist, because it originally arose and continues to carry on themes from the teaching, guidance, and writings of the late Joseph Sax, the eminent pioneer of the environment law field. Sax emphasized the interaction between common law and public law statutory structures, and introduced the public trust doctrine as a thread undergirding and running through the entire field of environmental law. Features: Coverage of the December 2015 Paris COP-21 climate agreement in its several different aspects, incorporating analysis by co-author Prof. David Wirth who played an active role in international preparations for the Paris accord. Expanded material on carbon pricing/carbon taxes until recently widely thought to be a politically impossible alternative avenue for mitigation of global climate disruption. Fracking case and discussion materials on fracking, the major new fossil energy extraction technology that is changing the energy profile and landscape of the U.S. Tracking major recent revisions in toxic substance regulation, with essential comparisons to the contemporary European model of market access chemical regulation. Regulation of Greenhouse Gases under the Clean Air Act and otherwise. The Flint, Michigan toxic lead water pollution disaster, with both civil and criminal repercussions. An updated guide through the complexities of tensions between private property rights and environmental protections, and an innovative clarification of recent Supreme Court case law. An innovative chapter on official planning a basic and problematic element of environmental governance, whether at the local level or the national public lands level.
