By JenniferI had to purchase this book for a class I am taking.

Environmental harms associated with pollution of the air, land, and water kill and injure more people than street crime on an annual and daily basis. Financially, the losses associated with environmental damage are enormous. Environmental Law, Crime, and Justice addresses these issues through providing an introduction to the study of environmental issues pertinent to the study of environmental crime, contemporary environmental law, environmental policy, and environmental justice. This timely book blends together areas that are often treated or studied individually or in isolation from one another. Designed for classroom use, Environmental Law, Crime and Justice exposes readers to the variety of issues involved in the study of environmental law, crime and justice; illustrates the serious nature of these problems; and demonstrates how readers can and should become involved in studying environmental crime, law and justice. The book offers an important step toward preventing further environmental destruction.

About the Author Ronald G. Burns is an Associate Professor and Director of the Criminal Justice Program at Texas Christian University. He is the author of four books and over 30 journal articles and book chapters. His research interests include corporate deviance, environmental crimes, and policing issues.
