Hudson, Phillip Kenny, Nigel Gravells, Paul Dobson, Alastair Hudson, Richard Kidner : Equity Trusts (Principles of Law) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Equity Trusts (Principles of Law):

A comprehensive rationalization of the principles of Equity and Trusts intended for undergraduate and CPE students studying this complex area of law. The text works using articles which set out the core principles and then proves those articles in a discussion of the cases and statutes. The text contains a broad-ranging discussion of the periodical and practitioner literature. The developments in restitution are similarly covered in depth. Although mainly aimed at students, the coverage should also be suitable for course conversions and the practical structure could also be useful to the high street practitioner.
