OUTDATED - NOT for anyone after the year 2005By Jim JrThis book, has a lot of Information, however, It is not a wise choice for Pharmacy technicians planning on PASSING their Student Pharm Tech REquired Licensing exam after the year 2005.Material is outdated. Thanks9 of 9 people found the following review helpful. Don't waste your money.By A CustomerAs an Instructor and Pharmacist, I would not recommend anyone purchase this book as it is outdated and filled with poorly formatted tables (which encompass the majority of the book).This text is neither a stimulating nor accurate source of information on pharmacy law and ethics. Look elsewhere.

As the practice of modern medicine becomes more and more pharmacology dependent, the role of pharmacy technicians is becoming more complex. This is true in terms of the medications they are required to deliver, as well as the legal responsibilities and ethical considerations that come with administering those medicines. *Essentials of Law and Ethics for Pharmacy Technicians*, now in its Third Edition, is designed specifically to provide technicians with the legal and ethical information they need to perform their jobs with absolute confidence. It covers all U.S. federal laws regarding pharmacy practice as well as other laws and regulations and their applicability to pharmacy technicians. It also addresses current issues such as herbal medications, privacy laws and rules, and drug pedigree. A unique section on ethics offers extensive discussion points and cases. Appendices provide extensive information on practice regulation in all states. Fully revised to address the latest procedural, ethical, and technological developments in this rapidly changing field, this third edition of a bestseller has been edited for clarity and provides a wealth of new material, including a new appendix on the legal status of electronic transmission of prescriptions. It covers the latest in state and federal regulations pertaining to the administration of new medications, including birth control and the morning-after pill, as well as new regulations on over-the-counter label claims. An essential resource for students and practicing technicians, this reference brings together the information that pharmacy technicians need to practice in a manner that is both legal and ethical. **Whats New in this Edition:** Updated information on over-the-counter label claims Updated sections on drug samples and the Combat Methamphetamine Epidemic Act of 2005 New sections on drug pedigrees and United States Pharmacopoeia Chapter 797 Expanded discussion of state rules and ethics regarding dispensing the morning-after pill and birth control medications New appendix on the legal status of electronic transmission of prescriptions **Pedagogical Features:**Offers end-of-chapter discussion questions and examples Contains a chapter on ethics with discussion points and cases Presents information in an easy-to-read format Comes with a CD-ROM containing PowerPoint slides for classroom use

Praise for previous editions: "I highly recommend this book to pharmacy technician educators, as it is an excellent reference guide. The book also gives information that is helpful in lectures. The authors purpose for the book to provide information aimed directly at the pharmacy technician has been met in an easy-to-read and understandable format." Judith Neville, Program Director, Vatterott College, in *Pharmacy Technology*, Nov/Dec 2007, Vol. 23 **About the Author** Kenneth M. Strandberg is the program director of the Pharmacy Technician Program at the North Dakota State College of Science in Wahpeton, North Dakota, a position he has held since 1994. This program has certificate and associate degree options, both available via on-campus and distance-learning options (both paper-based and web-based). Since 1988, he has also been an adjunct professor of pharmacy practice at North Dakota State University in Fargo and an adjunct assistant professor of medicine at the University of North Dakota School of Medicine in Grand Forks. He retired as the pharmacy department manager at a Veterans Administration hospital and clinic, and is now the associate director for scientific applications at Cetero Research, a pharmaceutical research firm. He received his BS in pharmacy in 1974 and MBA in 1984, both from North Dakota State University. Erin E. Miller is a pharmacy resident at a Veterans Affairs hospital and clinic. She received her Pharm.D. in 2010 from North Dakota State University. She is a member of the American Pharmacists Association and the American College of Clinical Pharmacy and an alumna of Kappa Psi Pharmaceutical Fraternity.
