She makes a daunting process easier by using humor, stories of clients and practical directions that take the mystery out of estate planning. As she says, no matter what your age and level of wealth, the most loving thing you can do for your spouse, significant other, children and relatives is to make a will, or set up a trust with a capable attorney like MaryClare, someone who really cares about YOU. 4 of 4 people found the following review helpful. Great resource for anyone looking into estate planning! By Jerry Faught Excellent discussion of estate planning issues. I refer to this book whenever a question arises concerning trusts and the need for putting a plan in place. I've recommended it to several friends.

A comprehensive explanation of the requirements for estate plans, trusts, powers of attorney, wills, and other wealth preservation and protection tools. Written by an estate planning attorney in California, but the principles apply to anyone considering these essential legal protections.
