Hugh Breakey, Vesselin Popovski : Ethical Values and the Integrity of the Climate Change Regime (Law, Ethics and Governance) before purchasing it in order to gage whether or not it would be worth my time, and all praised Ethical Values and the Integrity of the Climate Change Regime (Law, Ethics and Governance):

This book investigates the ethical values that inform the global carbon integrity system, and reflects on alternative

norms that could or should do so. The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change. This architecture can be understood as an 'integrity system'- an inter-related set of institutions, governance arrangements, regulations and practices that work to ensure the system performs its role faithfully and effectively. This volume investigates the ways ethical values impact on where and how the integrity system works, where it fails, and how it can be improved. With a wide array of perspectives across many disciplines, including ethicists, philosophers, lawyers, governance experts and political theorists, the chapters seek to explore the positive values driving the global climate change processes, to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system. The collection focuses on the nexus between ideal ethics and real-world implementation through institutions and laws. The book will be of interest to policy makers, climate change experts, carbon taxation regulators, academics, legal practitioners and researchers.

'While I believe that cooperative international action on climate change is unlikely to happen until after islands disappear or massive property loss occurs in the wake of a climate change-induced storm, a book like this is important for advancing public consciousness about climate change ethics and governance. This book talks cogently about decentralized and unsystematic collective problem solving and explores climate ethics and the moral problems raised by climate change. The book shows how human rights took decades to become universal, and climate ethics may be at the beginning of a similar trajectory.' --Armin Rosencranz, Jindal Global University, India, and co-editor of *Climate Change Science and Policy*

International debate and action addressing the impacts of climate change are bedevilled by a vacuum at the interface between the normative and empirical, between values and the practical. *Ethical Values and the Integrity of the Climate Change Regime* addresses this gap comprehensively. This timely collection of cross disciplinary expertise commendably combines ethical analysis with resources essential to public policy and public debate.' --Noel Preston, Griffith University, Australia

About the Author Hugh Breakey is a Research Fellow at Griffith University's Key Centre for Ethics, Law, Justice and Governance, Australia. His work stretches across the philosophical sub-disciplines of political theory, legal philosophy, normative ethics and applied philosophy. He is the author of *Intellectual Liberty: Natural Rights and Intellectual Property* (Ashgate). His works explore the ethical issues arising in such diverse fields as peacekeeping, institutional governance, climate change, sustainable tourism, private property, medicine and international law. Since 2013, Hugh has served as President of the Australian Association for Professional and Applied Ethics. Vesselin Popovski is Vice Dean and Executive Director of the Centre for United Nations Studies at Jindal Global University in India. He previously worked as Senior Academic Officer at the United Nations University in Tokyo, Director of the EU project 'Legal Protection of Individual Rights in Russia' (2002-2004), lecturer at the University of Exeter, UK (1999-2002), Research Fellow, NATO Democratic Institutions Programme (1996-1998) and Bulgarian diplomat (1988-1996) serving in Sofia, New York and London. He currently sits on the Advisory Board of the 'Journal of International Humanitarian Legal Studies' and of the Editorial Boards of 'International Studies' and of 'Sustainability Science'. He has published numerous articles in peer-reviewed journals and authored and edited over twenty books. Rowena Maguire is a Senior Lecturer in the School of Law and Co-Chair of the International Law and Global Governance Research Program at the Queensland University of Technology. Rowena's principal research interests and publications concern international climate and forest regulation with a focus on equitable design and implementation.
