Talks about how virtue ought to play a part in how social services are dispensed by "professionals." Makes one wonder about professionals in practice now that don't have this essential ingredient in the way they minister care to the public. The topic is

noteworthy; the way it is addressed is well done. Recommended for those in the profession of social workers or those on the receiving end of social work.

This agenda setting text explores a broad range of value perspectives and their impact on and contribution to social work thinking on ethics. Including new perspectives, such as Islam, and drawing on international contributors, this is essential reading for all social work students studying ethics and values.
