**Edward J. Kelley, Charles D. Larsen, Anita Varma, Christopher P. Carroll, Ropes Gray LLP : European Patent Practice for U.S. Attorneys** before purchasing it in order to gage whether or not it would be worth my time, and all praised European Patent Practice for U.S. Attorneys:

EXPLORE substantive and procedural differences between European patent law and U.S. patent law. As Europe progresses toward ratifying the European Unitary Patent and Unitary Patent Court, and the U.S. adjusts to Alice and the Patent Trial and Appeal Board, a major global sea change in patent law is afoot. This change will greatly impact the relevance and global impact of European patent rights, as European patents become enforceable in all European Patent Convention (EPC) states. That change will likely trigger the need for U.S. companies to pursue more extensive European patent protection. To help prepare for the new Europe, European Patent Practice for U.S. Attorneys provides attorneys, agents, and technical advisors with a useful and practical understanding of how European patent rights are secured. This useful guide helps U.S. patent attorneys obtain an understanding of basic European patent law, develop European patent practice skills, avoid mistakes, and succeed at the European Patent Office. It provides a comprehensive overview of the European patent law as compared to U.S. patent law that enables the reader to understand European Patent Office (EPO) concepts and procedures, focusing on key differences between the U.S. and the EPC. It also provides concise examples of various European patent prosecution techniques and numerous

procedural recommendations for EPO patent prosecution. In particular, this guide helps attorneys: Decide whether to file for European patent rights on inventions that are important to a U.S. business Avoid mistakes made during the prosecution of a European application that can jeopardize the related U.S. patent position (e.g., an important U.S. patent for Abbott Labs was held unenforceable based on conflicting positions taken by the attorney at the United States Patent Office versus the European Patent Office) Expedite victory in the U.S. by learning how to successfully prosecute a European patent (e.g., C.R. Bard s successful defense of a European Opposition brought by ACS, Inc. that lead to a \$100 million settlement of a pending U.S. litigation) Become more advanced practitioners of global patent law by comparing EPO and United States Patent and Trademark Office (USPTO) practice, as well as European and United States patent laws European Patent Practice for U.S. Attorneys includes references to laws, policies, and practices of the European Patent Organization and compares them to the laws and policies followed by the USPTO, highlighting the elements of patent law and practice that are common to both jurisdictions and those elements of patent law that are core to any legal framework seeking to reward inventive and creative activity. Armed with this knowledge, U.S. attorneys can become more effective in dealing with their European patent attorneys and better serve their clients.
