From Round Hall Ltd : Fiduciary, the Insider and the Conflict before purchasing it in order to gage whether or not it would be worth my time, and all praised Fiduciary, the Insider and the Conflict:

Concern about regulation of insider dealing in the context of new and controversial legislation in Britain, and significant developments in the courts relating to fiduciary liability, led the British Institute of Securities Laws, in conjunction with Jesus College, Cambridge, to organize a two-day workshop in July 1994. The deliberations of those involved in these proceedings inspired this collection of essays. This title seeks to give the reader a series of perspectives of some of the issues involved in fashioning an acceptable level of control over such abuses.
