Rita Hammer, Barbara Moynihan, Elaine M. Pagliaro : Forensic Nursing: A Handbook For Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Forensic Nursing: A Handbook For Practice:

3 of 3 people found the following review helpful. Forensic Nursing a Handbook for PracticeBy Jerronious of Lake City, FLThis book was necessary to take the course Forensic Nursing: Theory and Practice.The information is provided in a dull but informative academic fashion. The courseis through the American Institute of Health Care Professionals and follows the textclosely. The book is rather expensive. There are few graphics and the graphics thatare presented are of poor quality. For the price of the book I would have expectedexcellent color pictures, rather

than grainy black and whites. However, that being said, the book is helpful and informative. I would recommend it for academic use but not something you would want to read like a novel. 2 of 2 people found the following review helpful. Lots of Information, Very Dry By Book Sake This is the first textbook I've purchased for school that was so dry. The entire book is like reading one long manual without any of the accompanying pictures. While it was very informative and helpful for my class and I am very interested in Forensic Nursing, this is not something that I will continue to refer to as I can't imagine wanting to read any of it outside of the classroom. 0 of 0 people found the following review helpful. Textbooks By Amy Golash I am very happy with my purchase. The book arrived in good shape sooner than expected. I highly recommend .

Forensic Nursing is based on the Standards of Forensic Nursing Practice developed by the International Association of Forensic Nursing. Developed within a holistic, caring framework, and well grounded in theory and research, this unique, comprehensive reference text on forensic nursing provides an interdisciplinary perspective, and addresses the need for collaborative practice and skill in caring for victims of violence and disaster, as well as in competently assisting in investigations.
