Thomas C Rawlings : Georgia Child Welfare and Juvenile Justice before purchasing it in order to gage whether or not it would be worth my time, and all praised Georgia Child Welfare and Juvenile Justice:

This book describes Georgias system of identifying, managing, treating, rehabilitating, and protecting children. The system is complex, and to cover it requires exploring federal and state law and regulations; explaining the work of numerous federal and state agencies; investigating the roles of courts, attorneys, judges, volunteers, and providers;

understanding the intricacies of family relationships and child development; considering the effects of mental illness, trauma, drugs, incarceration; and searching out the best methods to treat troubled children and dysfunctional families. Chapters include: Child Development and Children in Court, Juvenile Delinquency, Dependency, Children in Need of Services. The Juvenile Court. Dependency Forms, CHIN S Forms, and Uniform Juvenile Court Forms are included in the book and on the accompanying CD. The book also includes a case table and index. The book is available in EPUB format with hyperlinks to the full text of cases, statutes and other authoritative content.

From the Author
The children and families with whom we interact are seldom what they appear to be at face value; rather, they come to us as a bundle of experiences, many of them traumatic, that we must use all of our skills to decipher. We need investigators to determine their histories; evaluators to determine their family situations, strengths, and needs; therapists and social workers to determine where they are broken and how to repair their wounds; attorneys to determine their desires and advocate for them; guardians ad litem to determine their best interests; judges to put everything in context, bring services to bear, and map out their futures; foster parents and family to love them; academics to tell us what the latest research shows; and policymakers and legislators to give us the framework and funding to make all this work possible.
