Carr got a call from the publisher saying his book was due and he wrote it during a drug induced all-nighter where no idea was a bad idea. The book does contain some semblances of good ideas in the parts where it blatantly plagiarizes Foonberg's How to start and build a law practice. Buy the Foonberg version, its much better. 3 of 3 people found the following review helpful. I Thought It Was Written Specifically For Me! By kfarm83 Not only is the book an easy read, its an Extraordinary Read!!! The layout of the book and the author's detailed instructions within, made this book extremely helpful and informative. There is nothing easier like following a checklist of things to do to start and/or build a successful solo practice and that's exactly what this books does for you. I felt like the author wrote this book specifically for someone like me. After reading this book, and being able to personally contact the author, I am more confident now than I have ever been in going out there and hanging my own shingle. 0 of 0 people found the following review helpful. A very mixed bag-- the bad far outweighs the good. By Aaron Lukken My B.S. detector started going off in the first few pages when the author opined that, surely, you're contemplating a solo practice (and therefore reading this book) because the economy is in the tank. [Of *course*! Nobody in 2015 is going solo because they actually *want* to!] But he lost my attention just a few chapters in, when he said that solo lawyers have two choices in how to organize: sole proprietorship or corporation. That's just not extraordinarily outdated, it's extraordinarily bad *legal* advice. I will say that he's incredibly encouraging, but I get that from my wife and colleagues. I just blew thirty bucks.
